- Free to roam the global fixed income universe to seek the best risk-adjusted opportunities by credit quality, duration, interestrate environment, sector and currency
- · The Mackenzie Fixed Income team has several years of experience with ESG investing and utilizes a proprietary process to identify risks and uncover opportunities in both corporate and sovereign debt around the globe.

Risk Tolerance

LOW	MEDIUM	HIGH

* Effective June 1, 2022, the redemption charge purchase option, and the low-load purchase option are no longer available for purchase, including those made through systematic purchase plans such as preauthorized contribution plans. Switching from securities of a Mackenzie Fund previously purchased under the redemption charge or low-load purchase options to securities of another Mackenzie Fund, under the same purchase option, will continue to be available until such redemption schedules expire

"The major holdings of the Fund may, but do not necessarily, represent the largest holdings of the Fund. Rather, the major holdings are selected for their overall significance in evaluating the investment portfolio. *** Credit ratings and rating categories are based on ratings issued by a designated rating organization.

† Series SC - For fixed income funds, this series is the front-end load purchase option, equivalent to series A.

+ Commissions, trailing commissions, management fees, and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return the historical annual compounded total returns as of January 31, 2025 including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution, or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Standard deviation provides a measure of the variability of returns that have occurred relative to the average return. The higher the standard deviation, the greater is the range of returns that has been experienced. Standard deviation is commonly used as a measure of risk.
